

## **Junior Network Engineer**

### **About Cameo Global:**

Cameo Global is an IT professional Services and Communication Company with unique capabilities in delivering large scale IT solutions, managed services and worldwide implementations of Collaboration and Contact Centers.

### **Function:**

**The Network Engineer will expand the Cameo Global Team in Zaventem, Belgium.** Cameo Global is hiring a Junior Network Engineer to expand its NOC team. As a member of this team it's your job to support and monitor enterprise networks across the EMEA zone as well as assisting the field engineers with design and implementation. During these processes you will be working primarily with CISCO equipment. The NOC engineer is responsible for incident management and handling service requests. During your job you will be covering a wide array of technologies including LAN, WAN, Security, VoIP, WLAN,...

The successful candidate is a team player with the capability of working cross-functionally with other program teams.

### **Your profile:**

- Bachelor or Master degree in information technology/computer science or similar by experience
- CCNA certified R&S or similar by experience is a definite plus
- Theoretical knowledge of LAN, WAN is preferred
- Knowledge in Collaboration is required (CCNA Level)
- Looking for a future more specific in Collaboration
- Knowledge of WLAN is a plus
- Ability to work effectively under tight circumstances
- Capable to work in team as well as independently
- Good knowledge of English is required
- Recent graduates are welcome
- Willing to work with a flexible work schedule
- Willing to work weekends

### **Our offer:**

- A challenging job in a professional, dynamic environment
- Ongoing training on the job
- A competitive salary
- Company car with fuel card
- Health insurance
- Life insurance (Pension plan)
- Meal vouchers
