

Guest lectures | For all graduate, bachelor's and master's degree programs

Title	Content of the session	Duration	Target audience
Why cybersecurity is important for everyone	A spotit information security consultant will explain why everyone has an important role in protecting an organization against cybercrime. We will share practical tips to better protect yourself.	60 – 90 min.	Everyone

Guest lectures | For the domains ICT security, networking, and systems

Title	Content of the session	Duration	Target audience
Role of a CISO in a security incident	Demonstration of how spotit handles a security incident at a customer. Explanation of the 6 steps of security incident response plan and application to a real use case.	60 min.	1 st to last years
A day in the life of a SOC analyst	Spotit has its own Security Operations Center (SOC) in which analysts constantly investigate incidents at customers. How do they work, which tools do they use, and how do they act when a security incident occurs?	60 min.	1 st to last years
Hands-on experience with security tooling based on CTF	Students can get hand-on practice with the security tools used in our SOC. We will start the session with a short explanation of the tools.	60 min.	1 st to last years
Active Directory Attacks & Defenses, the misuse of Kerberos	We explain why it's important to protect your Microsoft Active Directory. We'll zoom in on the defensive side, but also take a look at this through the eyes of a hacker: how do they abuse the Kerberos authentication protocol?	120 min.	Last years

A simulation of a Russian Threat Group attack	During a demonstration , our penetration tester shows how real Russian hackers work, and when and how the spotit SOC detects and intervenes.	60 min.	Last years
Graduated! What's next?	A spotit Academy trainee talks about his transition from school to the work field. What are the challenges? How to choose between different options? What competencies and knowledge do I really need? Which soft skills?	60 min.	1 st to last years

Optional: Beer o'clock @the campus

If the session takes place on a Thursday or Friday afternoon, we would love to organize a drink at your campus. We will create a pleasant informal moment to introduce students and spotit professionals and answer student's questions. Drinks and snacks are on us!

Company visit

You are always welcome to visit us in one of our offices, located in Merelbeke, Antwerpen, and Herk-de-Stad. We will give a presentation about how the spotit Security Operations Center (SOC) operates, combined with a guest lecture if wished.

Duration: 1 to 3 hours

Number: max. 20 students

Optional: Beer o'clock @the office > If the visit takes place on a Thursday or Friday afternoon, we will organize a drink in our office. Our professionals will attend to start a conversation with students and answer their questions. Drinks and snacks are on us.

Internships

Every year, spotit offers different internships within the domains security and networking. They usually concern a well-defined assignment or case, or a research & development activity.

Assignments 2023:

- Automate Microsoft Azure security assessment
- Cloud Security Maturity assessment

Interested?

Do you wish to talk about one of the above topics, or schedule a guest lecture?
