Introduction to Cisco DNA Center

Kareem Iskander
DEVNET-1234

CISCO *Live!*

Barcelona | January 27-31, 2020

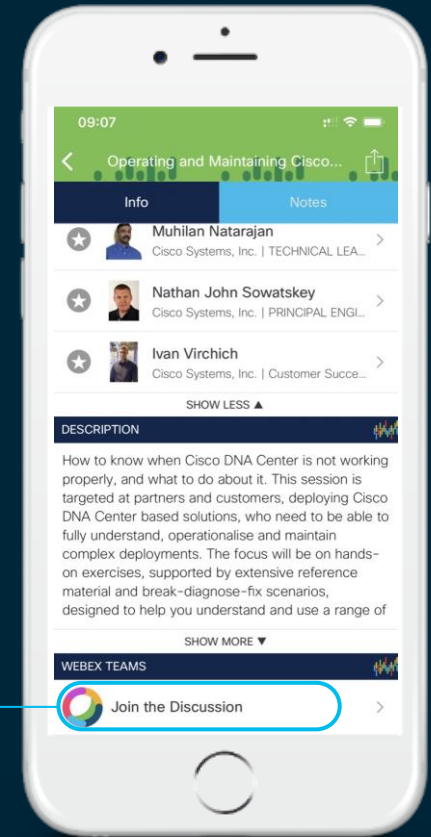

Cisco Webex Teams

Questions?

Use Cisco Webex Teams to chat with the speaker after the session

How

- 1 Find this session in the Cisco Events Mobile App
- 2 Click “Join the Discussion”
- 3 Install Webex Teams or go directly to the team space
- 4 Enter messages/questions in the team space

Agenda

- What is Cisco DNA Center?
- What is a REST API?
- Anatomy of a REST Request
- REST API Example With DNA Center
- REST API Tools
- Postman API Demo

What is Cisco DNA Center?

Cisco DNA Center (DNA-C)

- “Cisco DNA Center is the network management and command center for Cisco DNA, your intent-based network for the enterprise.”

Cisco DNA Center

**Logical workflow to design,
provision, set policy**
Respond to changes faster

**Monitor end-to-end
network performance**
Predict and act on problems
before they happen

Pinpoint problems faster
Reduce downtime with an
end-to-end view instead of
hop by hop

**Manage hardware and
software lifecycles**
Keep up to date, meet
compliance and plan for refresh

**Cisco DNA Center: Design,
provision, automate policy and
assure services from one place**

What is Cisco DNA Center Platform?

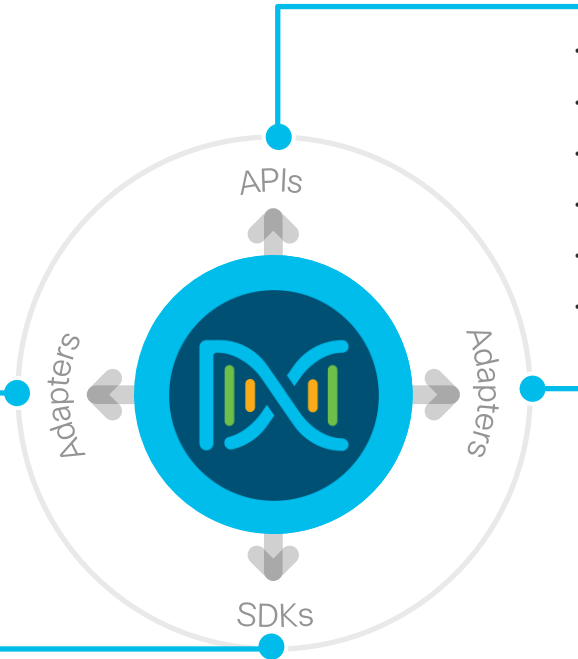

Platform Capabilities – APIs, Adapters & SDKs

IT and Network System Process

| | | |
|---------------|--|-----------|
| servicenow | | ITSM |
| Infoblox | | IPAM |
| BLUECAT | | Reporting |
| + a b l e a u | | |

Intent APIs

- Assurance
- Path Trace
- Command Runner
- Template Programmer
- NFV Provisioning
- Wireless Provisioning
- Network Inventory / Discovery / Tagging
- SDA
- Topology
- Plug-n-Play
- Software Image Management (SWIM)

X-Domain Integration

3rd Party SDKs

Map 3rd Party Network Devices to Data Model

Level 1 Operations support:

Discovery, Inventory, Topology, Availability, Command Runner

Intent APIs

Network APIs

- Network Level - Features based API
- Consistent model for feature across all devices types
- All UI capabilities of Cisco DNA Center available via the API
- Example: SWIM workflow
 - Create Sites and Network Profiles
 - Create sub-pool for sites
 - Assign site to network profiles
 - Assign Claim device to site
 - Trigger Provision request for ENCS device

Business APIs

- Intent Based API for network operations
- Network capabilities abstraction
- API's aligned with business constructs
- Custom Business API from an aggregation of network APIs

Example of Business Intent API: SSID Creation

- Create Dynamic Interface
- Create SSID
- Create Wireless Network Profile
- Associate device physical location
- Associate managed AP locations
- Provision WLC

➤ **Create and Provision SSID**

Cisco DNA Center Platform

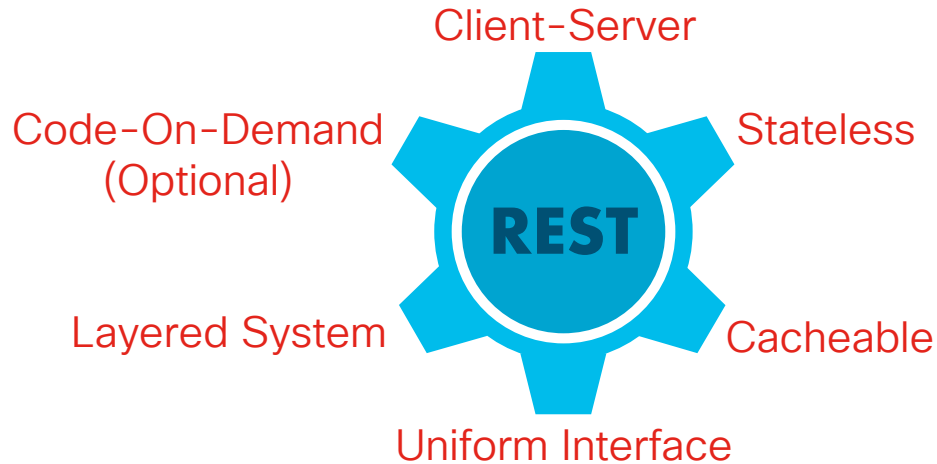

Events & Notifications

What is a REST API?

What is REST?

- REpresentational State Transfer (REST) is an **API architectural style**
- 6 Principles of REST:

- Can be applied for any protocol, but HTTP is the most common

What is an API?

- An interface that exposes selected data, services, and functionality of an application
- Set of requirements that govern how one application can talk to another
- Built to be consumed by another application that uses them programmatically

What can you do with APIs?

- Automate tasks
 - Write a script for your manual tasks
- Build applications
 - Dashboards
 - Client applications
 - Mobile apps
 - Web applications
- Extend product functionality

Why are APIs now popular?

Simpler API & Language Maturity

- RESTful APIs
- Expressive Modern Languages

Reliable

- APIs are designed into products and not an afterthought
- Tested as a component of the product

Online Communities

- Social Code Sharing (GitHub, Code Example)
- Public Package Repositories

What is a REST Web Services API?

- Adheres to the principles of the REST architectural style
- Communicate over HTTP protocol
- An interface for applications to send and receive data between each other
- Commonly known as REST API

GET

POST

PUT

DELETE

{REST}

Cisco DNA Center Walk Through and Hands on API

Complete your online session survey

- Please complete your session survey after each session. Your feedback is very important.
- Complete a minimum of 4 session surveys and the Overall Conference survey (starting on Thursday) to receive your Cisco Live t-shirt.
- All surveys can be taken in the Cisco Events Mobile App or by logging in to the Content Catalog on ciscolive.com/emea.

Cisco Live sessions will be available for viewing on demand after the event at ciscolive.com.
