

# Connect with Career Opportunities Around the World

## Talent Bridge helps NetAcad students find great job opportunities at Cisco or Cisco partners with the Networking Academy Talent Bridge Matching Engine

Now, NetAcad students have an exclusive resource for identifying exciting career opportunities – the Networking Academy Talent Bridge Matching Engine. Gain instant visibility to Cisco’s ecosystem of employers with this new resource, specially designed for Networking Academy students and graduates.

### Find and apply for open jobs

The Matching Engine uses student profile data to display relevant, open positions based on criteria including course completions, location and more. Certifications and work experience are also used to match students to posted jobs. Students can then apply for jobs that peak their interest, right from the Matching Engine dashboard.

### Choose from premier global employers

Cisco, plus partner organizations such as CDW, Ingram Micro, and StraightUp Technologies are using our Matching Engine. These top employers are searching for qualified candidates who have networking skills – CCNA training, CCENT, security training, or other desired industry certifications. Help students find high-potential jobs in sales, engineering, marketing and more.

## Get the most out of Talent Bridge

Over 15,000 NetAcad graduates are now participating in our matching program and the number is steadily growing. Ensure your students take advantage of this resource to find their next great opportunity.

### Registering is easy:

1. Login to NetAcad.com
2. On the top right, next to your name, click on “Resources;” scroll down to select “Career Resources”
3. Click on “Matching Engine”
4. [Register](#) to begin searching

### Sign up today to access:

- Cisco jobs: Search openings with Cisco, and get the attention of Cisco recruiters
- Cisco internships: Get real-world experience while you’re still in school– and build your resume
- Job opportunities with Cisco partners: Reach out and apply for positions with global organizations everywhere
